

Importing a Demo

After activating Phlox Pro license, you are able to import a complete demo site with a few clicks. Each demo has been created for a specific purpose; for example, setting up a food blog website. To import a demo follow below steps:

Step 1 – Navigate to **Phlox Pro > Demo Importer** menu on the **Dashboard** of **WordPress Admin Panel**.

Step 2 – Choose your desired design from the list and click on the **Import** button. You can also preview the demo by clicking the Preview button.

Step 3 – After choosing the demo, you may be asked to install some required plugins based on the functionality of the selected demo.

Note: If some demos are locked, you can unlock the entire list by [Purchasing a Phlox Pro License](#) and activating the license.
